Whether your project is a new backsplash, a shower, or a wall, tile trims can beautify and inspire while providing exceptional protection from chipping or breakage of tiled edges. Our patent pending integrated *Straight Edge Grout Line™* feature, creates a perfect space differential between the tile and trim. We offer a wide selection of premium finishes, backed by a industry leading 10YR wear and finish warranty.

Perfect choices for protecting your mosaic or wall tiles.

L-Shape Straight edges are available in both aluminum and PVC. This profile is an excellent choice for a subtle finished look for edges, bath and shower enclosures and flooring of same height. PVC trims can be used for a lower cost option on wall edges and corners, but should not be used in flooring applications.

R-Shape- Choose this profile for with gentle curved or round feature. Perfect for choice for edges along shower walls, tub frames or counter tops. PVC trims can be used for a lower cost option on walls and

Q-Shape- The unique reveal of this square shape profile is an excellent alternative for walls or counter edges. Can be used in floor or wall applications.

Whether your project is a new entry way, bathroom, or beautiful tiled floors throughout your home, our trims help protect your investment and add a touch of class to the finished look. Patent pending designs and the industry's best wear and finish warranty make our trims the choice of leading retailers and professionals across the country. The L, Q, and U shape profiles feature our integrated *Straight Edge Grout Line™* creating the exact spacing you need between the trim and tile.

Perfect choices for protecting floor tiles.

L-Shape-straight edge profiles available in both aluminum and PVC. This profile is an excellent choice for a subtle finished look for transitions between floors of equal height. PVC trims can be used for a lower cost option on wall edges and corners, but should not be used in flooring applications.

Q-Shape- Popular square shape can be used in a wide variety of flooring applications. Create decorative accents in flooring.

U-Shape- A smartly designed universal floor reducer. Use this profile when you need a product to transition between your tiled floor and a floor of slightly lower elevation. Its ADA (American Disability Act) and features our integrated *Straight Edge Grout Line™*. applications.

T-Shape- Easily installs and creates a flat seam binder that transitions floors of equal heights. Also used to create accents in floor and wall applications.
